The Cardiac Bioelectricity & Arrhythmia Center (CBAC) Presents:

Long QT Syndrome

by Arthur Moss, M.D.

Professor of Medicine (Cardiology)
Founding Director, Heart Research
Follow-up Program
University of Rochester Medical Center

Monday, January 27
5:30 p.m. - 6:30 p.m.
Reception at 5:00 p.m.
Brauer Hall Room 12
Danforth Campus

The world’s foremost expert on long QT syndrome—a condition that puts patients at risk for sudden cardiac arrest—Moss was one of the researchers who discovered the genes responsible for the disorder. For more than 20 years, he has led a team of cardiologists in reducing potentially fatal cardiac arrhythmias through advances in drug treatment, such as beta blockers, and through devices like implantable cardioverter defibrillators.
